

## Abstract

\$ZON Token is an innovative digital token designed to revolutionize the financial landscape through its multichain technology, enabling seamless cross-blockchain transactions. Integrated within the ZON ecosystem, it offers a variety of utilities such as governance participation, staking for rewards, and access to ecosystem services. With a deflationary model ensuring stability and value appreciation, \$ZON Token also features native integration with top DApps, including XDSea NFT Marketplace, RoRo Wallet, and ZebraSwap. Profits from these DApps flow back to \$ZON holders, reinforcing its value proposition.

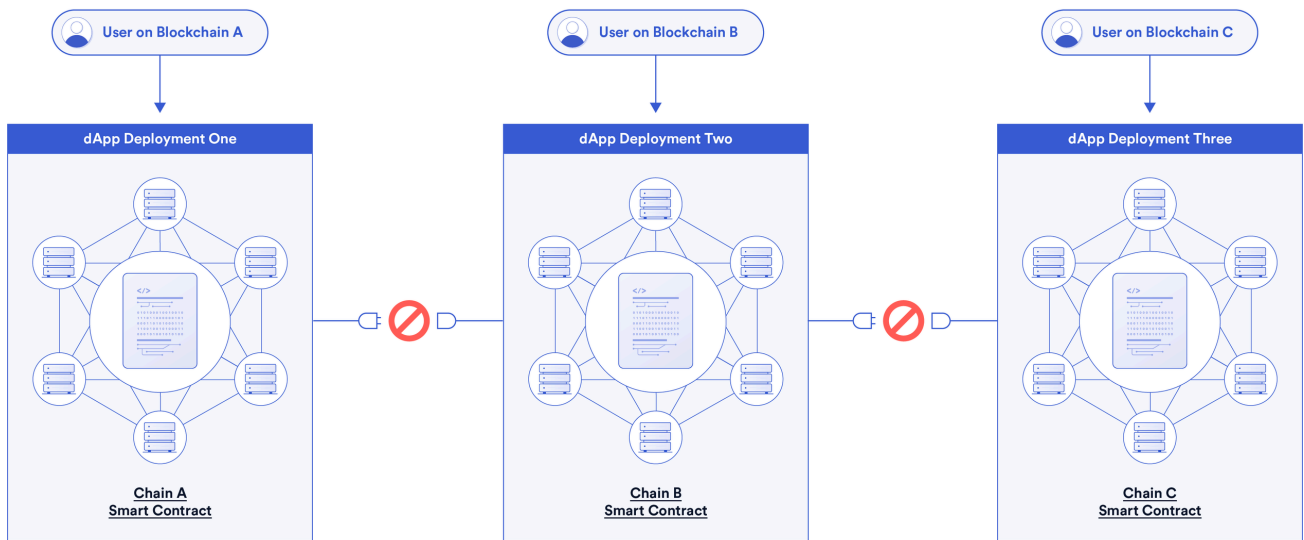

## Introduction

Welcome, investors, to the official unveiling of \$ZON Token! This exciting new token is set to change the game in the blockchain industry. Let us take you on a journey through its innovative features and use cases.

### UNVEILING \$ZON TOKEN

At the core of \$ZON Token is its multichain technology. \$ZON facilitates cross-blockchain transactions, making it a unique offering in the cryptocurrency space. It has many use cases within the larger ZON ecosystem, and we're excited to introduce you to

**Multichain:** One of the standout characteristics of ZON Token is its multichain compatibility. Unlike many tokens confined to a single blockchain, ZON Token effortlessly moves across various blockchains, ensuring that users can access a wide range of blockchain ecosystems without constraints.

**Native Integration with Leading DApps:** ZON Token isn't just compatible with decentralized applications (DApps), it's natively integrated with some of the most influential DApps in the crypto space. This native integration enhances its functionality and usability, making it an essential tool for users of platforms like XDSea NFT Marketplace, RoRo Wallet, and ZebraSwap.

XDSea is a NO-code platform that aims in empowering creators with our cutting-edge staking wizard and seamless integration with real-world assets (RWA) and RWU (real world utilities) projects.

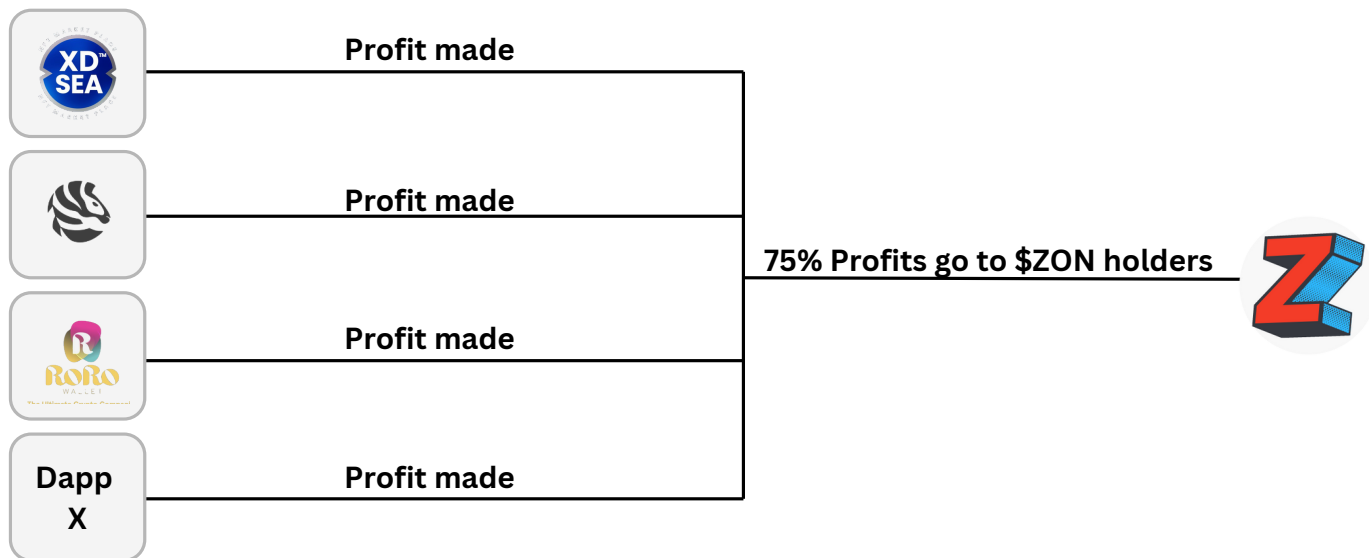

Zebra is a decentralized exchange (DEX) featuring a decentralised ETFs, a universal EVM contract for seamless access to DeFi markets across multiple blockchains. With community governance, users shape the platform by voting on listings. Zebra offers secure trading, staking, and farming, all in a user-friendly interface.

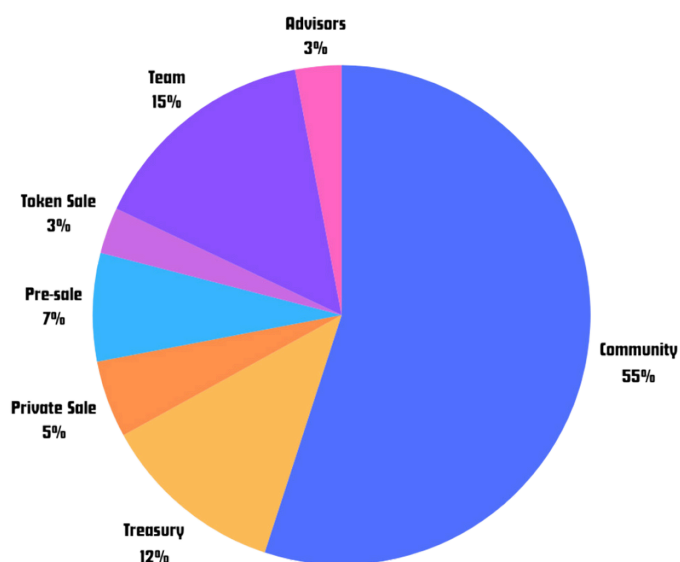

RoRo Wallet is a leading decentralized crypto wallet offering secure asset management, private messaging, and seamless access to DeFi services. Our user-centric platform is designed to simplify the crypto experience and empower users worldwide. Join us in redefining decentralized finance for all.

**Profit-Sharing:** At ZON we're dedicating to serving our community, which is a sentiment we made sure is also reflected in our tokenomics, governance protocol and most importantly the company revenue and profits. The profits made by the ZON ecosystem will flow back to \$ZON holders.

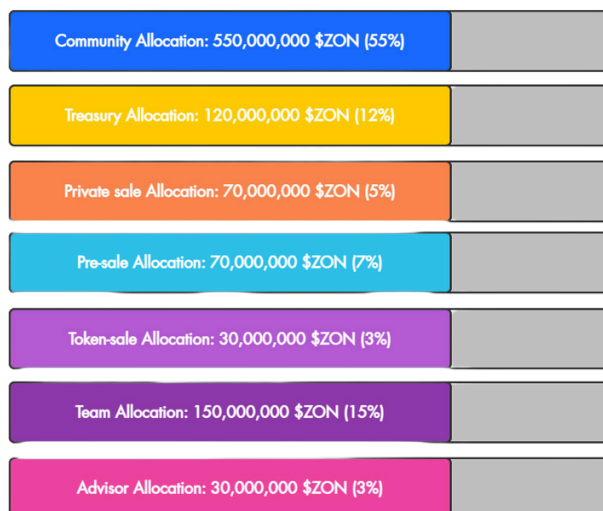

## Tokenomics

**Utility-Rich Tokenomics:** ZON Token isn't merely a store of value; it's a utility-rich token. Holders of ZON Token enjoy numerous benefits, including governance participation, staking for rewards, and access to a diverse range of services within the ZON ecosystem. It's a versatile tool for both crypto enthusiasts and DeFi enthusiasts.

### TOTAL SUPPLY : 1,000,000,000 \$ZON

### Private Sale (5%):

**Token Allocation: 50,000,000 Tokens**

This 5% will be reserved for seed, VC, private, strategic, KOL, and or angel rounds

### Pre-Sale (7%):

### **Token Allocation: 70,000,000 Tokens**

This 7% will be reserved for the community, high-net individuals and institution

### **Token Sale (3%):**

#### **Token Allocation: 30,000,000 Tokens**

This 3% will be available to everyone participating in the public round

### **Community (55%)**

#### **Token Allocation: 550,000,000 Tokens**

The Community would be allocated the majority of the token to facilitate various sort of value generation events in the community ranging from, staking, yield farming, and airdrops.

#### *Liquidity and Market Making (20%):*

- Creation of liquidity pools on decentralized exchanges
- Incentive programs for liquidity providers.

#### *Community Development (30%):*

- Initiatives to foster community growth, engagement, and education.
- Community forums, AMAs, and events to enhance interaction.

#### *Marketing and Promotion (25%):*

- Comprehensive marketing campaigns targeting both crypto enthusiasts and a wider audience.
- Partnerships with influencers and strategic marketing channels.

#### *Incentive Programs (Staking, Yield Farming, Airdrop) (25%):*

- Farms: allocated reserves would stand at 10% of the community reserves
- Staking: allocated reserves would stand at 10% of community reserves
- Airdrop: allocated reserves would stand at 5% of community reserves

### **Treasury (12%):**

#### **Token Allocation: 120,000,000 Tokens**

The Treasury fund will be used for securing partnerships and bounty programs with minimal funds flowing through to day-to-day operations not covered by the team tokens pool.

### **Advisors (3%):**

#### **Token Allocation: 30,000,000 Tokens**

Vesting Period: 2 years

Cliff: 4 Months

Release Schedule: 25% quarterly after the cliff

### Team (15%):

**Token Allocation: 150,000,000 Tokens**

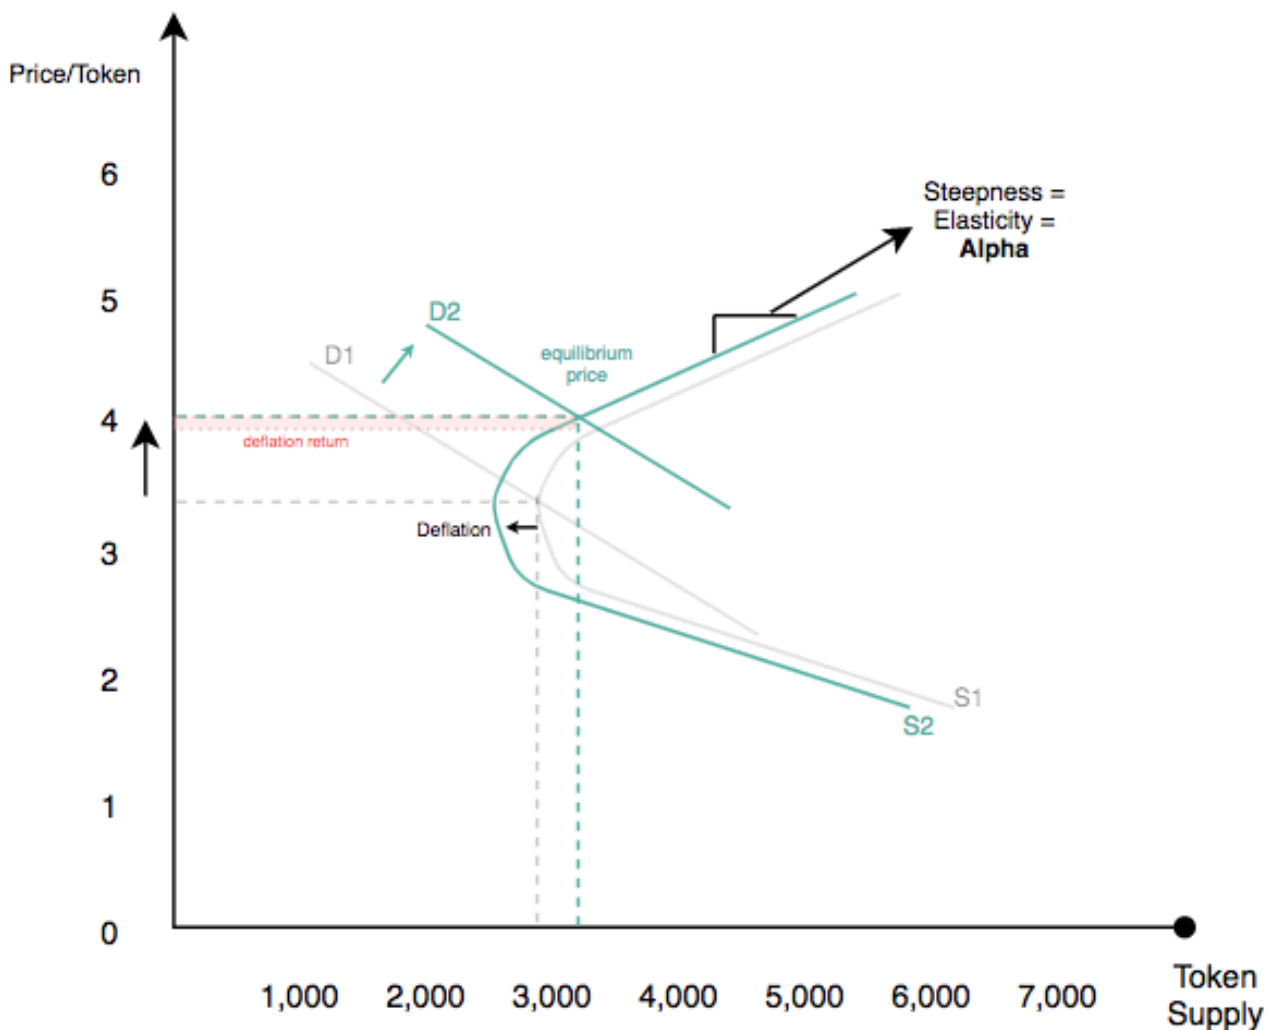

Vesting Period: 4 years

Cliff: 1 year

Release Schedule: 25% on Token Generation Event (TGE), then 25% annually after the cliff.

## Deflationary Model

**Limited Supply:** Ensures stability and potential value appreciation

Some movement from D1 to D2 and full movement from S1 to S2 is from the actions of the company. Steepness/elasticity of the S lines is determined by the token holders (strong or weak hands in crypto-speak)

# Roadmap

## Q1-Q3 2024: Initial Launch Phase

### ***Token Smart Contract Creation:***

Develop and deploy the \$ZON smart contract.

Conduct rigorous security audits by third-party firms to ensure robustness.

### ***Website and Whitepaper:***

Launch a retro-themed official website showcasing \$ZON's features and benefits.

Publish a comprehensive whitepaper detailing \$ZON's utility, tokenomics, and roadmap.

### ***Pre-Sale and Private Sale:***

Begin pre-sale and private sale phases on multiple chains (Ethereum, XDC, Wanchain, BSC).

Accept payments in native tokens or USDT (ERC-20).

### ***Community Building:***

Initiate social media campaigns across Twitter, Telegram, and Discord.

Onboard influencers and create a brand ambassador program.

## Q3 2024: Ecosystem Development

### ***DApp Integrations:***

Integrate \$ZON with top decentralized applications such as XDSea NFT Marketplace, RoRo Wallet, and ZebraSwap DEX.

Develop partnerships with other DApps for future integrations.

### ***Staking and Governance:***

Launch \$ZON staking platform allowing holders to earn rewards.

Implement governance mechanisms enabling token holders to participate in decision-making.

### ***Marketing and Awareness:***

Execute targeted marketing campaigns to raise awareness and onboard new users.

Host AMAs, webinars, and community events to engage with the community.

## **Q3 2024: Expansion Phase**

### ***Cross-Chain Functionality:***

Enhance \$ZON's cross-chain compatibility for seamless movement across blockchains.

Partner with additional blockchains to expand \$ZON's reach.

### ***Profit-Sharing Mechanism:***

Activate profit-sharing mechanism where 75% of profits from DApps flow back to \$ZON holders.

Regularly update the community on profit distributions and financial health.

### ***Liquidity and Market Making:***

Create liquidity pools on decentralized exchanges to ensure smooth trading.

Introduce incentive programs for liquidity providers.

## **Q4 2024: Growth and Scaling**

### ***Platform Enhancements:***

Upgrade the platform's infrastructure to handle increased user activity.

Implement advanced security features to protect user assets and data.

### ***Community Development:***

Foster community growth through targeted campaigns and engagement strategies.

Expand the brand ambassador program to include more influencers and crypto enthusiasts.

### ***New Partnerships:***

Form strategic partnerships with other blockchain projects and financial institutions.

Collaborate with tech firms to explore innovative use cases for \$ZON.

## **Q1 2025: Marketing Rounds and KOLs**

### ***Key Opinion Leaders (KOLs):***

Partner with KOLs to amplify \$ZON's reach and credibility within the crypto community.

Leverage KOLs' influence to drive adoption and awareness.

### ***Influencer Campaigns:***

Launch influencer marketing campaigns targeting various demographics.

Create engaging content to highlight \$ZON's features and benefits.

## **Q2 2025: Exchange Listings and Accelerator Tie-Ups**

### ***Exchange Listings:***

List \$ZON on major cryptocurrency exchanges to increase liquidity and accessibility.

Aim for listings on both centralized (CEX) and decentralized exchanges (DEX).

### ***Accelerator Partnerships:***

Collaborate with blockchain accelerators to support \$ZON's growth and innovation.

Participate in accelerator programs to gain mentorship, resources, and networking opportunities.

### **Q3-Q4 2025: Long-Term Vision**

#### ***Global Adoption:***

Strive for global adoption of \$ZON by entering new markets and regions.

Collaborate with international exchanges for wider accessibility.

#### ***Innovative Use Cases:***

Continuously explore and develop new use cases for \$ZON within the blockchain ecosystem.

Stay at the forefront of blockchain innovation by adopting emerging technologies.

#### ***Sustainable Growth:***

Ensure sustainable growth by maintaining a balanced token supply and demand.

Regularly review and adapt the roadmap based on community feedback and market trends.

### **2026 and Beyond: Future Prospects**

#### ***Decentralized Autonomous Organization (DAO):***

Transition to a fully decentralized autonomous organization to empower the community further.

Implement advanced DAO governance tools for efficient decision-making.

#### ***Ecosystem Expansion:***

Expand the ZON ecosystem by developing new DApps and services.

Focus on interoperability with other blockchain ecosystems to enhance \$ZON's utility.

### ***Ongoing Community Engagement:***

Maintain high levels of community engagement through regular updates, events, and rewards.

Foster a loyal and active community of \$ZON holders and users.

## **FAQ'S**

### **1.Q: What is the purpose of the Private Sale?**

A: The Private Sale is reserved for early supporters, including Seed, VC, Private, Strategic, KOL, and Angel Rounds. It provides exclusive access to tokens at a discounted rate, fostering initial project support.

### **2. Q: How can I participate in the Pre-Sale?**

A: Participation in the Pre-Sale involves registering with us. Detailed instructions will be provided closer to the Pre-Sale date.

### **3. Q: What benefits do token holders receive in the Community category?**

A: Community token holders enjoy various benefits, including opportunities for staking, yield farming, airdrops, and active participation in shaping the project's future through governance.

### **4. Q: How are Team tokens vested?**

A: Team tokens follow a 4-year vesting schedule with a 1-year cliff. The first 25% is released on the Token Generation Event (TGE), followed by 25% annually after the cliff.

### **5. Q: Can I earn tokens through staking in the Community category?**

A: Yes, the Community category, comprising 55% of the total supply, allows participants to earn tokens through activities such as staking, yield farming, and airdrops.

### **6. Q: What is the purpose of the Treasury category?**

A: The Treasury category, constituting 12% of the total supply, is allocated for securing partnerships, executing bounty programs, and funding other strategic initiatives to support project growth.

**7. Q: How are Advisors compensated for their contributions?**

A: Advisors receive tokens as compensation for their thought leadership and ongoing contributions. The vesting period is 1 year with a 1-quarter cliff, followed by 25% quarter releases.

**8. Q: Can I purchase tokens after the Token Sale period?**

A: Once the Token Sale period concludes, tokens may be available on secondary markets. However, it's crucial to exercise caution and use reputable platforms.

**9. Q: How can I stay updated on project developments and announcements?**

A: Regular project updates, announcements, and important information will be shared through official channels, including our website, social media platforms, and email newsletters.

**10. Q: What measures are in place to ensure a fair token distribution?**

A: The token distribution strategy is designed to be inclusive, with categories like the Community category prioritizing broad participation. We aim for transparency and fairness in all allocation phases.
